

Consumer Protection Against Credit Card Fraud

A. Technical Field:

Utility Patent of a useful process and useful improvement

B. Background Art:

This new method consists of picture concealed in card. A consumer in control of their own account, card cannot be duplicated and will decrease the number of criminals using stolen credit cards. The old method of the credit card with the picture on the outside front cover, can be duplicated. Can be used without identification and the criminal will know the person's identity and can be used to his/her advantage.

C. Brief Summary of Invention:

The Consumer Protection Against Credit Card Fraud (Credit Card) will help protect the mass number of Credit Card Fraudulent activities by disclosing a hidden picture which appears as it is scanned, which allows the consumer to be verified more than once.

D. Viewing:

Major credit card appearance on front and back along with the hidden picture, social security number and pin number.

E. Claim: Attached

F. Abstract: Attached

G. Drawing: Attached

H. Sequence Listing:

Consumer purchase a product by credit card
Cashier swipes card
Consumer's picture appears on screen with ss# and pin#
Cashier verifies picture and signature
Transaction completed
(can then determine if stolen or not)
